

## GEBCO\_2014 Grid - artifact in the Mekong Delta region of Vietnam

In the Mekong Delta region (approximately 106°E, 10°N) there are grid cells in the GEBCO\_2014 Grid that have been wrongly assigned a value of '-1'. This is illustrated in the image below. This will be corrected in a future release of GEBCO's gridded data set.

### GEBCO\_2014 Grid
