The R3A-100™ is a precision anemometer designed for scientific research applications and features an asymmetric sensor head configuration, which allows for more accurate measurement of horizontal flows with minimum interruption of the prevailing wind.

This 3D ultrasonic anemometer will monitor wind speeds up to 45m/s and features a fast 100Hz sampling rate. R3A-100 is supplied as standard with 7 analogue outputs (U, V, W; SOS; PRT plus 2 analogue inputs) and is available with an optional inclinometer.

The R3A 100™ is of aluminium/carbon fibre construction and will operate effectively in environmental temperatures from -40°C to +60°C. Optional accessories are available including cables, sensor input units (analogue inputs) and power supplies.
