VAISALA

HM70 Hand-Held Humidity and Temperature Meter for Spot-Checking Applications

The Vaisala HUMICAP* Hand-Held Humidity and Temperature Meter HM70 is a high-performance, portable humidity reference that is exciting to use.

The Vaisala HUMICAP* Hand-Held Humidity and Temperature Meter HM70 is a user-friendly meter for demanding spot-checking humidity measurements. It is ideal for field checking and calibration of Vaisala's fixed humidity instruments.

Three probes to choose from

The HMP75 is a general purpose probe for humidity measurements between -20 and +60 °C. The HMP76 is a long, stainless steel probe for humidity measurements between -50 and +120 °C. It is especially suitable for spot-checking in ducts. The HMP77 is a small probe at the end of a 5-meter cable. The probe is ideal for difficult-to-reach areas and for on-site calibration of Vaisala's process transmitters. The measurement range is for temperatures up to +180 °C.

One or two probes can be connected simultaneously. In addition, the HM70 supports the use of Vaisala's dewpoint, carbon dioxide and moisture in oil probes, allowing measurements in multiparameter applications.

Easy-to-use user interface and three-variable display

The HM70 features a multilingual, menu-based user interface, and a clear graphical LCD display. Overall three measurement parameters can be displayed and logged into the meter's memory at the same time. An analog output option is also available.

Proven HUMICAP® technology

The HM70 incorporates the latest generation of the Vaisala HUMICAP* Sensor. Its proven reliable and high performance humidity measurement ability is combined with better than ever long-term stability. Additionally, a sensor that has been developed to cope with chemical interference is available to provide accuracy that lasts in demanding conditions.

Stable performance in demanding applications

The chemical purge option maintains measurement accuracy in environments with high concentrations of chemicals. The sensor preheat option reduces measurement delays by keeping the

Features/Benefits

- Multilingual user interface
- Shows measurement trends graphically
- Proven Vaisala HUMICAP* Sensor technology
- 3 probe alternatives, temperature measurement ranges between -70 and +180 $^{\circ}\mathrm{C}$
- Multiprobe operation; dewpoint and CO₂ probes can also be connected
- 2 probes can be connected simultaneously
- Displays various humidity parameters
- Sensor preheat and chemical purge options for demanding conditions
- Data can be logged, and transferred to a PC via MI70 Link software
- NIST traceable (certificate included)

sensor dry when the probe is inserted into hot and humid processes.

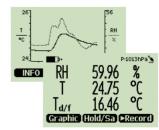

Calibration

The meter is calibrated at the factory against traceable standards, and delivered with a calibration certificate. The HM70 is also available with accredited calibration.

The HM70 probes can be sent to a Vaisala Service Center for a traceable recalibration.

MI70 Link

The optional MI70 Link Windows* software and the USB connection cable form a practical tool for transferring logged data and real time measurement data from the HM70 to a PC.

The graphic display shows the stabilization of measurements and process trends.

Technical Data

HMP75, HMP76 and HMP77 probes **Measured variables**

Relative humidity

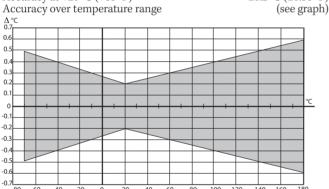

Measurement range 0...100 %BH

Accuracy (including nonlinearity, hysteresis and repeatability)

at +15 ... +25 °C (+59 ... +77 °F) ±1 %RH (0 ... 90 %RH) ±1.7 %RH (90 ... 100 %RH) at -20 ... +40 °C (-4 ... +104 °F) $\pm (1.0 + 0.008 \text{ x reading}) \% \text{RH}$ at -40 ... +180 °C (-40 ... +356 °F) $\pm (1.5 + 0.015 \text{ x reading}) \% \text{RH}$ Factory calibration uncertainty (+20 °C / +68 °F) ±0.6 %RH (0 ... 40 %RH) ±1.0 %RH (40 ... 97 %RH) (Defined as ±2 standard deviation limits.) Response time (90%) at +20 °C (+68 °F) in still air HMP75 (with standard plastic grid) HMP76 (with standard sintered bronze filter) 60 s HMP77 (with standard plastic grid and stainless steel netting) 50 s HUMICAP® 180R Sensor HUMICAP® 180RC (chemical purge, sensor preheat) Typical long-term stability better than 1 %RH / year Temperature Measurement range

HMP75 -20 ... +60 °C (-4 ... +140 °F) HMP76 -50 ... +120 °C (-58 ... +248 F) -50 ... +180 °C (-58 ... +356 °F) short time -70 ... +180 °C (-94 ... +356 °F) Accuracy at +20 °C (+68 °F) ±0.2 °C (±0.36 °F)

Accuracy over temperature range

Temperature sensor

Pt100 IEC751 1/3 class B

Calculated variables (typical ranges)

Dewpoint temperature -20 ... +100 °C (-4 ... +212 °F) Mixing ratio 0 ... 600 g/kg dry air Absolute humidity $0 \dots 600 \text{ g/m}^3$ Wet bulb temperature 0 ... 100 °C (+32 ... +212 °F) 0 ... 160 kJ/g Enthalpy Water vapor pressure 0 ... 1000 hPa The accuracies of these calculated variables are limited by the accuracies of the measured variables on which they are based, namely RH and T. The RH and T accuracies are stated above under Measured Variables

Probe general

Operating temperature range for electronic	cs -40 +60 °C
	(-40 +140 °F)
Housing classification	IP65 (NEMA 4)
Housing material	ABS/PC blend
Probe material	Stainless steel (AISI316L)
Cable length between probe and indicator	1.9 m
Weight	
HMP75	250 g
HMP76	350 g
HMP77	500 g
