CENTRE FOR ENVIRONMENT, FISHERIES & AQUACULTURE SCIENCE LOWESTOFT LABORATORY, LOWESTOFT, SUFFOLK, ENGLAND

2006 RESEARCH VESSEL PROGRAMME

PROGRAMME: RV CEFAS ENDEAVOUR: CRUISE 16/06

STAFF: J.M.ELSON

A.R.LAWLER S.R.LOVEWELL D.R.EATON K.R.BURNETT P.WHELPDALE A.BROWN (E & VM)

DURATION: 16 - 24 September

LOCALITY: North Sea (English NE Coast)

AIMS:

- 1. To conduct a standard underwater TV survey of Nephrops burrow densities on the Farn Deeps grounds, 55° 35' 54° 45' N and 1° 30' 0° 40' W, and to evaluate Nephrops abundance for comparison with previous years.
- 2. To collect concurrent video data, using a second camera, which will be directly comparable with that collected from other *Nephrops* grounds.
- 3. To characterise sediment features at and between TV survey stations using a remote acoustic seabed discrimination system (swathe bathymetry and QTC).
- 4. To trial the deployment of a lander for the remote collection of static video observations and environmental data.

PLAN:

CEFAS ENDEAVOUR will sail on 16 September and will return to Lowestoft on 24 September. 105 stations will be visited (80 priority 1 stations; 8 priority 2 stations and 17 priority 3 stations) with the aim of recording a clear 10 minute continuous video transect of the sea bed at each. Provisional counts will be made of Nephrops burrow systems live at each station. The video will be reanalysed and the counts confirmed at sea.
