2. Description of Project

2.1 Nature and objectives of the project:

Long-term monitoring of cetacean abundance in the northeast Atlantic with minke whales as the target species. Surveys are conducted over six-year periods with a mosaic coverage of sub-areas to provide a complete coverage of the Northeast Atlantic at the end of a six-year period. The surveys are conducted under oversight of the IWC Scientific committee which receives annual survey reports and data sets for Implementation Reviews under of North Atlantic minke whales which are conducted at about 6 years' intervals.

2.2 If designated as part of a larger scale project, then provide the name of the project and the Organisation responsible for coordinating the project:

Cetacean sighting surveys in the Northeast Atlantic; Institute of Marine Research

2.3 Relevant previous or future research projects:

Previous similar surveys conducted in 1995, 1996-2001, 2002-2007, 2008-2013.

2.4 Previous publications relating to the project:

Skaug et al. 2004. Abundance of minke whales in the Northeast Atlantic: Availability in time and space. Can. J. Fish. Aquat. Sci. 61: 870-886.

Øien. 2009. Distribution and abundance of large whales in Norwegian and adjacent waters based on ship surveys 1995-2001. NAMMCO Sci. Publ. 7:31-47.

3. Geographical Areas

3.1 Indicate geographical areas in which the project is to be conducted (with reference in Latitude and longitude in decimal degrees, including coordinates of cruise/track/way points/sampling stations). Please provide coordinates in a separate excel spreadsheet. General area 53,00°N-62,00°N; 14,00°W-7,00°E.

Excel sheet enclosed.

3.2 Attach chart(s) at an appropriate scale (1 page, high-resolution) showing the geographical Areas of the intended work and, as far as practicable, the location and depth of sampling Stations, the tracks of survey lines, and the locations of installations and equipment.

Map enclosed.
