NOTIFICATION OF PROPOSED RESEARCH CRUISE

**DETAIL
PART B**

1. Name of research ship **BELGICA** Cruise N° **2006/18**
2. Date of cruise From **04 September** To **15 September 2006**
3. Purpose of research and general methods. (If the research work is being taken on behalf of a research institution of a third state, it is the responsibility of that state to obtain prior permission; it is essential that written confirmation that this has been done is obtained and quoted in this application.

In order to try to cope with the cod crisis, the European Commission decided to install new technical measures for fishing gear used in the North Sea. Recent research, however, showed that more effective methods are necessary to obtain a good species selectivity in the flatfish beam trawl. In this project, besides several other designs, the so called T90 cod-end will be tested. These experiments are carried out in Cupertino with other North Sea states and aim to support the « North Sea Cod Recovery Plan ».
4. Attach chart(s) showing (on an appropriate scale) the geographical area of the intended work, positions of intended stations, tracks of survey lines, positions of moored / seabed equipment.
