2. Description of project (Attach additional pages as necessary)

2.1 Nature of objectives of the project:

To assess the size of the Blue Whiting stock in the Rockall and Hatton Banks areas (ICES Divisions VIB, VIa with possible extension to the west and north into divisions XII and VBI respectively).

2.2 Relevant previous or future research cruises:

This is the continuation of an international project established in 2004.

3. Methods and means to be used

Acoustic survey using 18, 38, 120 and 200 KHz and fishing trawl hauls to confirm species composition of insonified fish echotraces. Parallel transects spaced at 40 nmi running perpendicular to the depth contours of the named areas of interest. Hydrographic stations and underway hydrographic data collection.
