The tagging and sampling program 1968-2010 and the RFID-tagging project which started in 2011 and will continue.

2.4 Previous publications relating to the project:

Cruise reports and a paper by Maria Tenningen, Aril Slotte and Dankert Skagen, 2011. Abundance estimation of Northeast Atlantic mackerel based on tag recapture data – a useful tool for stock assessment? Fisheries Research. 107: 68-73.

3. Geographical Areas

3.1 Indicate geographical areas in which the project is to be conducted (with reference in latitude and longitude in decimal degrees, including coordinates of cruise/track/way points/sampling stations). Please provide coordinates in a separate excel spreadsheet.

W of Ireland, from ca 51°N to 56°N, from 9°W to 13°W, mainly ca 15 n. miles or more off the coast.

W of Scotland, from ca 56°N to 60°N, from 7°W to 10°W, mainly along the slope (150 m to 400 m depth).

3.2 Attach chart(s) at an appropriate scale (1 page, high-resolution) showing the geographical Areas of the intended work and, as far as practicable, the location and depth of sampling Stations, the tracks of survey lines, and the locations of installations and equipment.

Mackerel tagging west of Ireland and Scotland in May/June 2017: Approximate limits of operation. Most of the work will be carried out along the edge of the continental shelf.
