9. BRIEF DESCRIPTION OF PURPOSE OF CRUISE
- 1) Acoustic assessment of the blue whiting spawning stock. The cruise is part of the international blue whiting survey coordinated through the ICES Planning Group on Northeast Atlantic Pelagic Ecosystem Surveys with participants from Ireland, the Netherlands, the Faroes, and Russia.
2) Measurements of acoustic target strength of blue whiting.
3) Observations on hydrography.

NOTIFICATION OF PROPOSED RESEARCH CRUISEPART B: DETAIL

1. NAME OF RESEARCH SHIP: F/V XXXX² CRUISE NO. 2008809
 2. DATES OF CRUISE From 25 March 2008 To 10 April 2008

3. a) PURPOSE OF RESEARCH

The main purpose of the cruise is the assessment of the spawning stock size, distribution and migrations of blue whiting using acoustic methods combined with sampling with pelagic trawls. The cruise is part of an international coordinated blue whiting survey with vessels from the Netherlands, Ireland, the Faroes, Norway, and Russia participating. Information on other species such as argentinnes, mackerel and horse mackerel is collected upon encounter. The survey is coordinated by ICES Planning Group on Northeast Atlantic Pelagic Ecosystem Surveys. The overarching plan of the survey is available in the web (<http://www.ices.dk/reports/RMC/2007/PGNAPES/pgnapes07.pdf>).
 Hydrographic investigations by use of CTD sonde.

b) GENERAL OPERATIONAL METHODS (including full description of any fish gear, trawl type, mesh size, etc.)

Echo sounding and trawling (see add. sheet), CTD.

4. ATTACH CHART showing (on an appropriate scale) the geographical area of intended work, positions of intended stations, tracks of survey lines, positions of moored/seabed equipment, areas to be fished

5. a) TYPES OF SAMPLES REQUIRED (e.g., geological/water/plankton/fish/radionuclide).

Fish.

b) METHODS OF OBTAINING SAMPLES (e.g., dredging/coring/drilling/fishing, etc. When using fishing gear, indicate fish stocks being worked, quantity of each species required, and quantity of fish to be retained on board

Fishing with pelagic trawl upon blue whiting, of which approx. 100 individuals/haul are required.

Quantity of fish to be retained on board: up to 1,800 tonnes of blue whiting. Other species: nil. When blue whiting is retained the vessel is run under the same conditions for operation, reporting and quota limits as other Norwegian vessels in purely commercial fishing in the EU countries' Economic Zones and Faroes Economic Zone.

6. DETAILS OF MOORED EQUIPMENT

<u>Dates</u>		<u>Description</u>	<u>Depth</u>	<u>Latitude</u>	<u>Longitude</u>
<u>Laying</u>	<u>Recovery</u>				

Short-term (up to about 24 hours) mooring of acoustic equipment used for measuring the acoustic target strength of blue whiting. The exact places and times to be decided on the basis of registrations.

7. ANY HAZARDOUS MATERIALS (chemicals/explosives/gases/radioactives, etc.
 (Use separate sheet if necessary)

² Institute of Marine Research is chartering a commercial fishing vessel for this survey, but the results of the competitive bid are not yet clear. The name and other details of the vessel will be announced immediately after this information becomes available.

9. NAMES AND ADDRESSES OF SCIENTISTS OF THE COASTAL STATE(S) IN WHOSE WATERS THE PROPOSED CRUISE TAKES PLACE WITH WHOM PREVIOUS CONTACT HAS BEEN MADE

(See add. sheet)

10. STATEa) Whether visits to the ship in port by scientists of the coastal state concerned will be acceptable (Yes/No)

Yes

b) Participation of an observer from the coastal state for any part of the cruise together with the dates and the ports for embarkation and disembarkation

Acceptable. Dates and ports to be closer settled if wanted by the coastal states.

c) When research data from the intended cruise is likely to be made available to the coastal state and by what means

April/May 2008, as cruise reports (one report for the international survey, one for the vessel chartered by the Institute of Marine Research separately). The results will also be summarized in the report of ICES Planning Group on Northeast Atlantic Pelagic Ecosystem Surveys, which will meet in 19-22 August 2008 in Hirtshals, Denmark.
