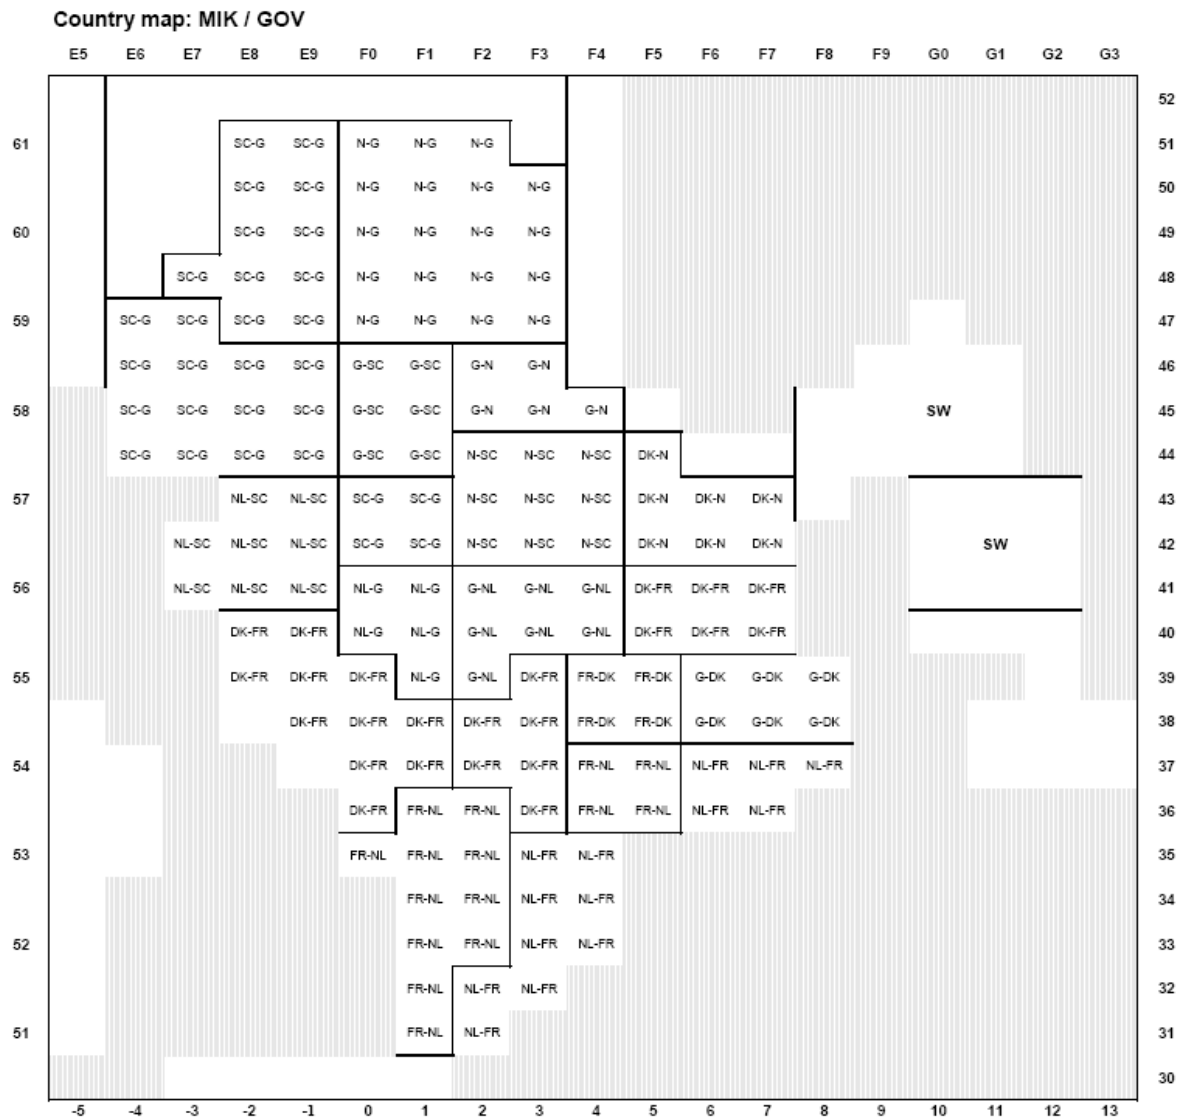

Figure 1. “G.O. Sars” will work rectangles marked with N-G, G-N, N-SC and DK-N. In addition the hydrographical sections Fedje-Shetland and Utsira-Start Point will be taken. In addition, 2 stations will be taken for egg and larva feeding process-studies. See Figure 2.

Figure 2. Process studies. Potential process study stations are indicated by the green cross-hatch areas. Both process study areas are within the standard MIK survey areas undertaken by IMR. The standard IBTS survey coverage is shown by the red outline.
