NOTIFICATION OF PROPOSED RESEARCH CRUISE

PART B: DETAIL

1. NAME OF RESEARCH SHIP R.V. Heincke

CRUISE NO. HE 189

- 2. DATES OF CRUISE From: 13/05/2003 To: 02/06/2003
- 3. a) PURPOSE OF RESEARCH

Chemical ecology and symbiosis research. The major goal of our research is to understand how marine invertebrates are chemically defended against predators or fouling organisms. In particular, we want to know which chemicals these organisms use to protect themselves from potential predators. Two of the current projects on invertebrates started already with the cruise two years ago (HE 151). Since we have some kind of understanding of the chemistry of these organisms and first results of biological and ecological assays, our investigations will be more specific with the focus on the organisms which were collected in 2001 (e.g. ecological observations).

b) GENERAL OPERATIONAL METHODS

(including full description of any fishing gear trawl type, mesh size, etc.)

We will primarily collect marine invertebrates or macroalgae by scuba diving or dredging. Additional plankton (water) samples are taken by pumping or by plankton-nets (up to 300 um). No fish gear will be used.

4. ATTACH CHART

(showing (on an <u>appropriate</u> scale) the geographical area of the intended work, positions of intended stations, tracks of survey lines, positions of moored/seabed equipment, areas to be fished)

Working area marked in attached map (see attachment), limited by 54deg 40'N - 61deg 00'N and 00deg 00'W - 05deg 00'W. Specific stations will be selected according to the previous research cruises to the Orkney Islands.

5. a) TYPES OF SAMPLES REQUIRED

(e.g. Geological/Water/Plankton/Fish/Radionuclide)

- 1) Benthic invertebrates and macroalgae (no fish)
- 2) Plankton

b) METHODS OF OBTAINING SAMPLES (e.g. dredging/coring/drilling/fishing, etc.) (When using fishing gear, indicate fish stocks being worked, quantity of each species required, quantify of fish to be retained on board)

- 1) Scuba diving
- 2) Dredging
- 3) Plankton-Net or pump (up to 300 um)
- 6. DETAILS OF MOORED EQUIPMENT
