2. Description of Project

2.1 Nature and objectives of the project:
<p>The aim of the cruise is to sample two standard transects for physical oceanographic parameters (CTD casts, nutrients and chlorophyll), phyto- and zooplankton, and fishlarvae for the IMR projects "Monitoring of climate and plankton in the North Sea Skagerrak", and "Early life history dynamics of North Sea Fishes".</p> <p>Data and samples will be collected on pre-selected stations along the two standard transects « Utsira-StartPoint » between Norway and the Orkney Islands and « Hanstholm-Aberdeen » between Denmark and UK.</p>

2.2 If designated as part of a larger scale project, then provide the name of the project and the Organisation responsible for coordinating the project:

2.3 Relevant previous or future research projects:
The cruise has been undertaken since 2006

3. Geographical Areas

3.1 Indicate geographical areas in which the project is to be conducted (with reference in Latitude and longitude in decimal degrees, including coordinates of cruise/track/way points/sampling stations). Please provide coordinates in a separate excel spreadsheet.

Survey area covers: North Sea: 57°N - 60° N; 8.11°E – 2.3° W

3.2 Attach chart(s) at an appropriate scale (1 page, high-resolution) showing the geographical Areas of the intended work and, as far as practicable, the location and depth of sampling Stations, the tracks of survey lines, and the locations of installations and equipment.
