Marine Scientific Research

Date:_01/03/2015

1. General Information

1.1 Cruise name and/or number: EVHOE 2015

1.2 Sponsoring Institution(s):IFREMER	
IFREMER	Institut Français de Recherche pour l'Exploitation de la Mer
Address:	155, rue Jean-Jacques Rousseau 92138 ISSY LES MOULINEAUX FRANCE
Name of Director:	François JACQ

1.3 Scientist in charge of the Project:	
Name:	Michèle SALAUN
Country:	FRANCE
Affiliation:	IFREMER
Address:	8, rue François TULLEC 56100 Lorient FRANCE
phone:	+33 2 97 87 38 14
Fax:	+33 2 97 87 38 01

Email:	Michele.Salaun@ifremer.fr
Website (for CV and photo):	

1.4 Entity(ies)/Participant(s) from coastal State involved in the planning of the project:	
Name:	Dr Brian Harley
Affiliation:	CEFAS Fisheries Laboratory
Address:	Lowestoff Suffolk NR33 OHT United Kingdom
Telephone:	direct) +44 (0) 1502 524254 +44 (0) 1502 513865
Fax:	
Email:	brian.harley@cefas.co.uk
Website (for CV and photo):	

2. Description of Project

2.1 Nature and objectives of the project:
French Bottom Trawl Surveys in Bay of Biscay and Celtic Sea (survey code : EVHOE)
<p><i>a) Purpose of survey</i></p> <p>The main objectives of the survey are :</p> <ul style="list-style-type: none"> - to obtain abundance indices per age group and annual recruitment estimates for the sampled species ; - to build a reliable time series of those indices ; - to follow the evolution of the demographic structures of the main exploited

fish populations ;

- to map the spatio-temporal distribution of the fisheries resources per age group.

b) Area surveyed

This French survey began in 1987. The area was limited to 48°30' N in the north and to the northern margin of Gouf de Cap Breton in the south (ICES divisions VIIh, VIIIa,b,c and d). In 1990, the survey area was extended towards the north (51°15' N) to cover the grounds of the Celtic Sea deeper than 100 meters (ICES divisions VIle,f,g,h and j).

c) Methodology

The GOV 36/47 bottom trawl is used with a 20 mm mesh codend liner. The trawl is deployed with plane oval trawl boards of 1300 kg and with 10-20 cm rubber discs on the footrope.

The haul duration is 30 minutes and the towing speed 4 knots. Trawling is carried out during day time only.

In the Bay of Biscay (ICES divisions VIIIa,b,c and d) and in the Celtic Sea (ICES divisions VIle,f,g,h and j), a stratified sampling scheme is used. The area is divided according to latitude into 5 blocks and the hauls were distributed in seven depth zones (15-30, 31-80, 81-120, 121-160, 161-200, 201-400, 401-600 m). 160 stations will be occupied at locations given in fig. 2.

Catch weight and catch numbers are recorded for all species, only selected finfish and shellfish are measured.

d) Extension of the study area in 1999 and 2000

Following the European contract DG XIV 98/057 " International Program of Standardised Bottom Trawl Surveys off Northwestern Europe", a comparative study of the different fish species catchabilities to the French/Irish and Irish/Scottish fishing boats/gears has been conducted in the Irish and U.K. waters (fig. 2). Following the SESITS program (1997-1998) involving the French, Spanish and Portuguese surveys, the whole study has led to the integration of the different data collected during surveys covering the area from Northern Scotland to the Strait of Gibraltar into an common international data base.

e) Improvement of knowledge on meso and bathy pelagic species

In 2001, 2002, 2003, 2007- 2011, 2013 several hauls using a pelagic trawl have been carried out in the northern part of Bay of Biscay and in 2014 in the south of Celtic sea at immersions above 1500 m, in order to collect

information on species which show a vertical migration during the night and can potentially be preys of marine mammals.

- f) *Observations of fishing grounds*
- f) *Observations of fishing grounds*

The available datasets of habitat mapping in the Celtic Sea are very scarce. The Pagure sled could be used to add missing information. This tool is to be used to get qualitative information (photo and video) of the nature of the seafloor for the different strata visited during the survey. A module using a laser beam and video is used to acquire supplementary information on granulometry and seafloor structure.

2.2 If designated as part of a larger scale project, then provide the name of the project and the Organisation responsible for coordinating the project:

2.3 Relevant previous or future research projects:

The survey was conducted in the fourth quarter (October-November) of each year from 1987 to 1990, in 1992 and 1994, 1995, 1997-2014 and also in the second quarter (May-June) of 1988 and 1991. The survey is intended to be carried in the future at least in 2015 and 2016 as the objective is the construction and the maintaining a long time series.

2.4 Previous publications relating to the project:

2.

Travaux de recherches déjà publiés par l'équipe scientifique sur ce sujet / Previously published research date related to the project

3. Geographical Areas

3.1 Indicate geographical areas in which the project is to be conducted (with reference in Latitude and longitude in decimal degrees, including coordinates of cruise/track/way points/sampling stations). Please provide coordinates in a separate excel spreadsheet.

Operations	Latitude	Longitude	Profondeur <i>Water depth</i>
bottom trawl	43°20' N to 52°30' N	1°20' W to 12°00' W	600 m
Pelagic trawl	43°20' N to 52°30' N	1°20' W to 12°00' W	2000 m
Pagure	43°20' N to 52°30' N	1°20' W to 12°00' W	<400 m

3.2 Attach chart(s) at an appropriate scale (1 page, high-resolution) showing the geographical

Areas of the intended work and, as far as practicable, the location and depth of sampling

Stations, the tracks of survey lines, and the locations of installations and equipment.

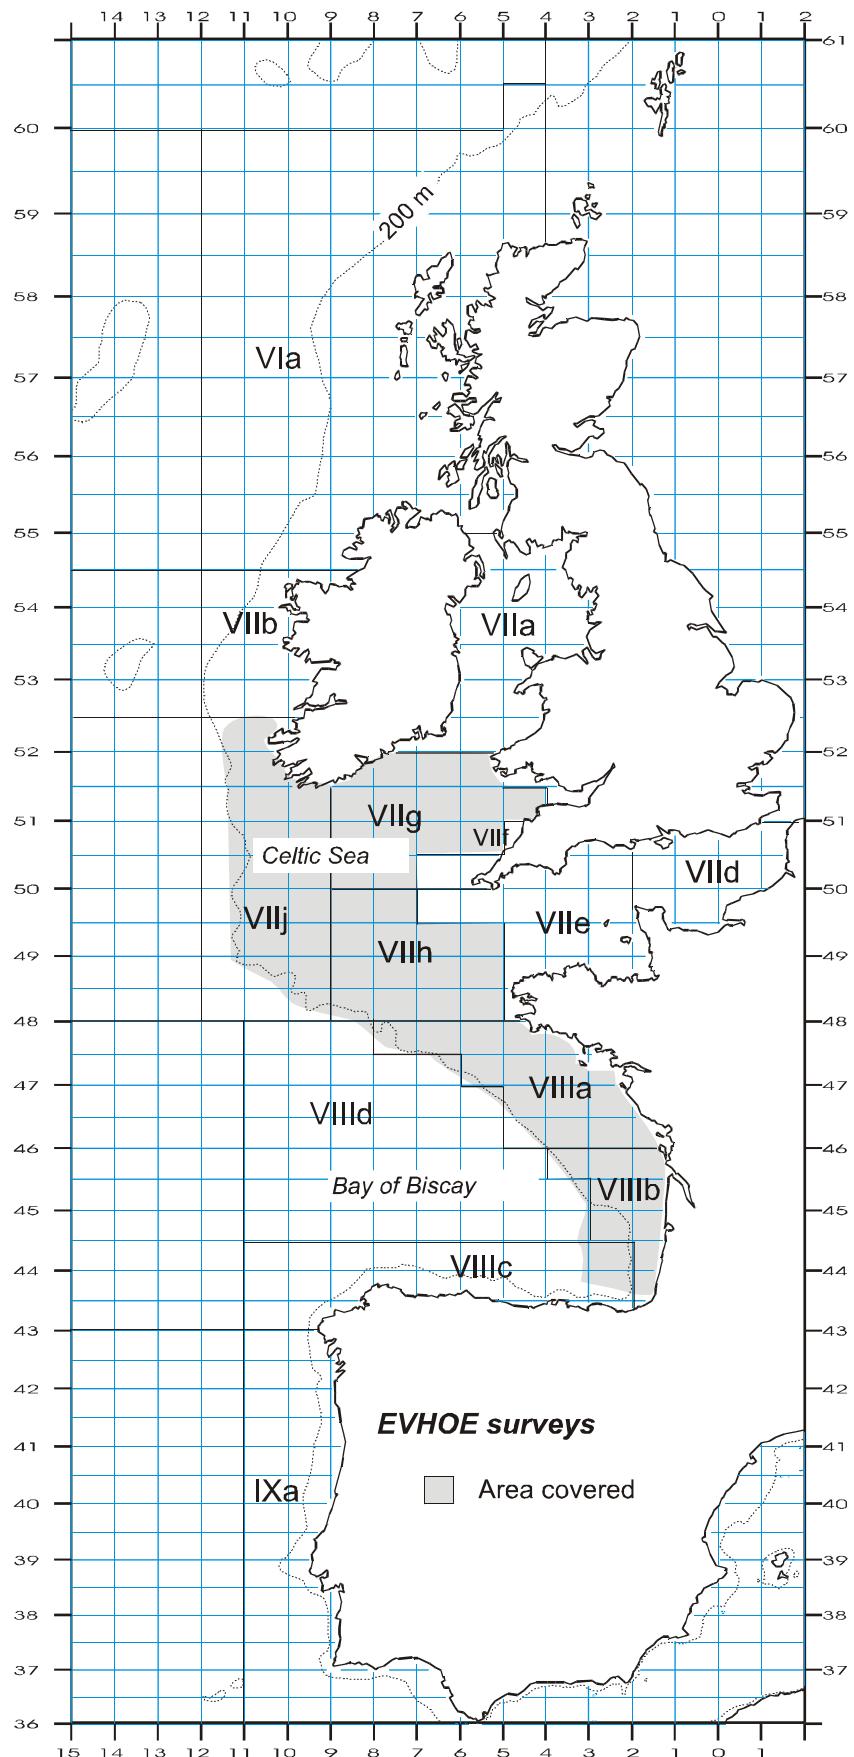

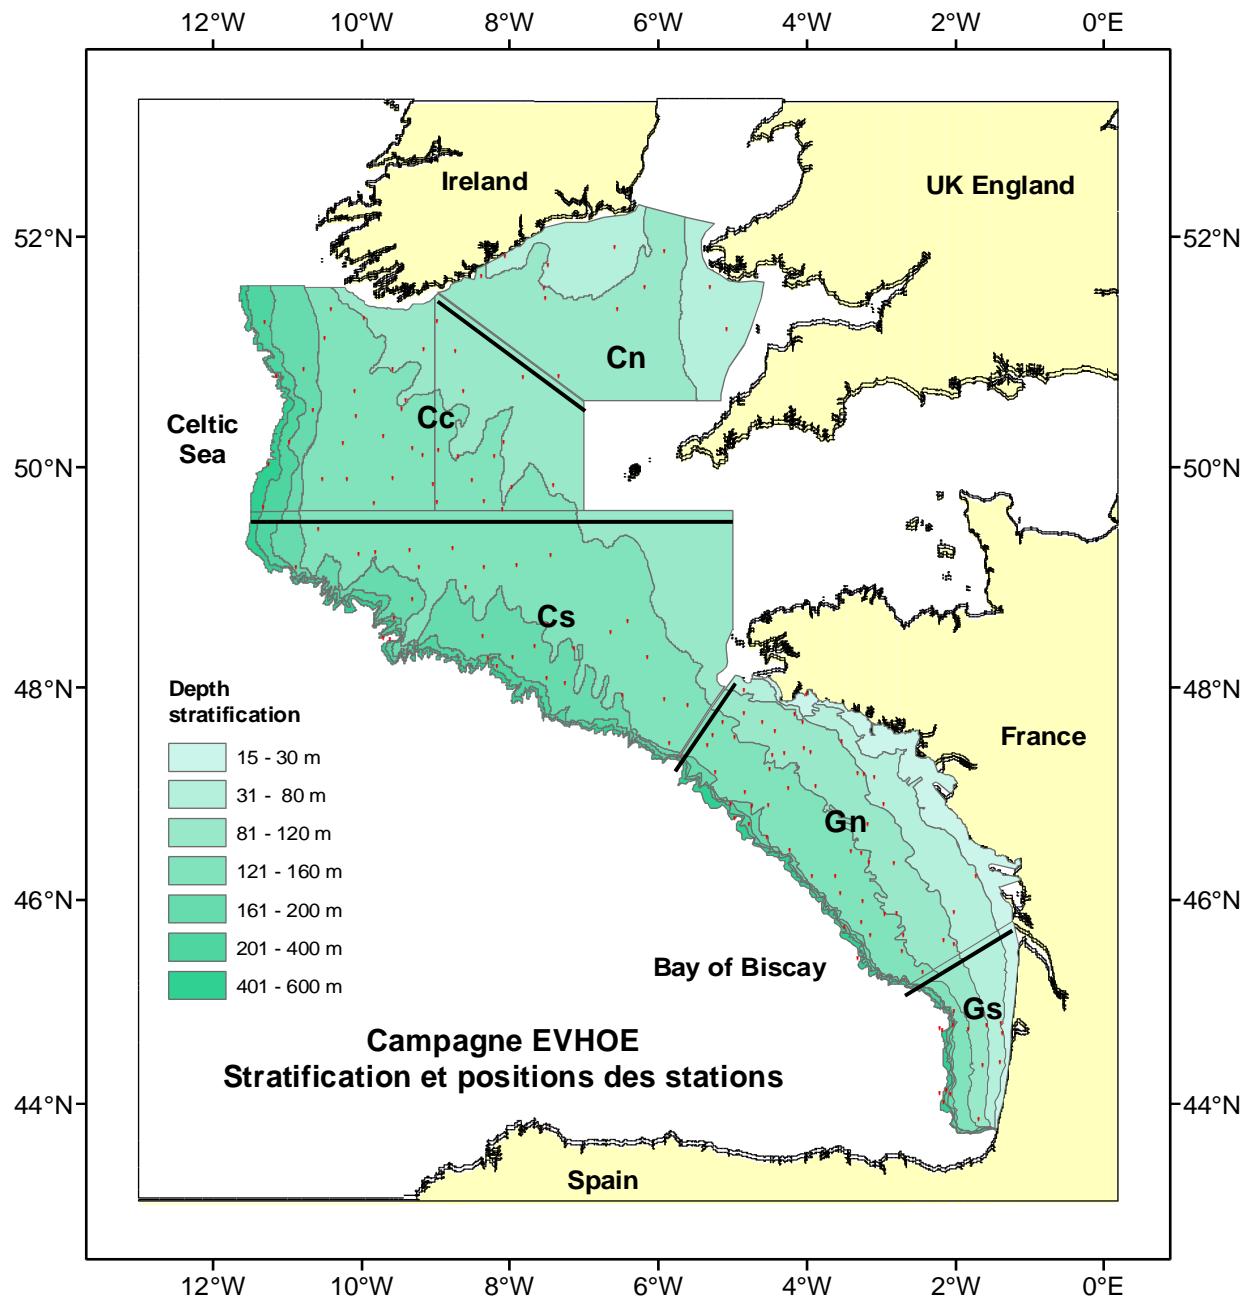

Fig. 1. - North-Eastern Atlantic ICES Statistical Areas and area covered during the EVHOE surveys.

4. Methods and means to be used

4.1 Particulars of vessel:

Name:	THALASSA
Type/Class:	Research vessel
Flag	French
Identification Number (IMO/Lloyds No.):	IMO=9070307
Owner:	IFREMER
Operator:	GENAVIR
Overall length (meters):	74,5 m
Maximum draught:	6,10 m
Displacement/Gross Tonnage:	2 803 UMS
Propulsion:	Diesel Electric
Cruising & maximum speed:	11 knots
Call sign:	FNFP
INMARSAT number and method and capability of communication (including emergency frequencies):	<p>Method and capability of communication (including telex, frequencies) :</p> <ul style="list-style-type: none"> - GSM : 33.6.07.32.44.87 (bridge) - 33.6.16.87.10.69 (captain) Fax : 33.6.20.18.50.20 Inmarsat : Tel : 00.870.7.731.600.16 (bridge) - Fax : 00.870.7.831.600.57 - Vsat : Tel : 33.2.98.22.48.05 (bridge) - Fax : 33.2.98.22.48.06 - Telex Inmarsat C1 : 058x.4.227.297.10 - Telex Inmarsat

Name of Master:	Loïc PROVOST
Number of Crew:	25
Number of Scientists on board:	25

4.2 Particulars of Aircraft:	
Name:	
Make/Model:	
Nationality (flag State):	
Website for diagram & Specifications:	
Owner:	
Operator:	
Overall Length (meters):	
Propulsion:	
Cruising & Maximum speed:	
Registration No.:	
Call Sign:	

Method and capability of communication (including emergency frequencies):	
Name of Pilot:	
Number of crew:	
Number of scientists on board:	
Details of sensor packages:	
Other relevant information:	

4.3 Particulars of Autonomous Underwater Vehicle (AUV):	
Name:	
Manufacturer and make/model:	
Nationality (Flag State):	
Website for diagram & Specifications:	
Owner:	
Operator:	
Overall length (meters):	
Displacement/Gross tonnage:	
Cruising & Maximum speed:	
Range/Endurance:	
Method and capability of communication (including emergency frequencies):	
Details of sensor packages:	

Other relevant information:	
-----------------------------	--

4.4 other craft in the project, including its use:

4.5 Particulars of methods and full description of scientific instruments to be used(for fishing gear specify type and dimension)			
Types of samples and Measurements:		Methods to be used:	Instruments to be used:
	biological observations on fish	trawling	bottom trawl GOV 36/47 Echo sounders
	hydrographic observations	Temperature and salinity	Sonde NKE 300m and 600 m
	Video observations	Submarine camera	PAGURE

4.6 Indicate nature and quantity of substances to be released into the marine environment:

4.7 Indicate whether drilling will be carried out. If yes, please specify:
NIL

4.8 Indicate whether explosives will be used. If yes, please specify type and trade name,

Chemical content, depth of trade class and stowage, size, depth of detonation, frequency of Detonation, and position in latitude and longitude:

NIL

5. Installations and Equipment

Details of installations and equipment (including dates of laying, servicing, method and Anticipated timeframe for recover, as far as possible exact locations and depth, and Measurements):

NIL

6. Dates

6.1 Expected dates of first entry into and final departure from the research area by the research vessel and/or other platforms:

October 17 ,2015

December 1, 2015

6.2 Indicate if multiple entries are expected:

YES

7. Port Calls

7.1 Dates and Names of intended ports of call:

[Redacted]

7.2 Any special logistical requirements at ports of call:

[Redacted]

7.3 Name/Address/Telephone of shipping agent (if available):

[Redacted]

8. Participation of the representative of the coastal State

8.1 Modalities of the participation of the representative of the coastal State in the research Project:

[Redacted]

8.2 Proposed dates and ports for embarkation/disembarkation:

[Redacted]

9. Access to Data, Samples and Research Results

9.1 Expected dates of submission to coastal State of preliminary report, which should include

[Redacted]

The expected dates of submission of the data and research results:

Cruise report within two months of the cruise ending

Proposed means for access by national scientists to data and samples

Research data will be available on ASCII files two months after the cruise ending.

9.2 Anticipated dates of submission to the coastal State of the final report:

Research data will be available on ASCII files two months after the cruise ending.

9.3 Proposed means for access by coastal State to data (including format) and samples:

All information will be available through the ICES International Bottom Trawl Surveys Working Group.

9.4 Proposed means to provide coastal State with assessment of data, samples and
Research results:

9.5 Proposed means to provide assistance in assessment or interpretation of data, samples
And research results:

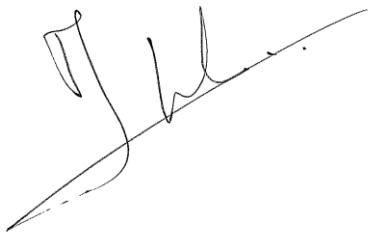

9.6 Proposed means of making results internationally available:

10. Other permits Submitted

10.1 Indicate other types of coastal state permits anticipated for this research (received or
Pending):

11. List of Supporting Documentation

11.1 List of attachments, such as additional forms required by the coastal State, etc.:

A handwritten signature in black ink, appearing to be "Michele SALAUN". The signature is fluid and cursive, with a prominent 'M' at the beginning.

Signature:

Contact information of the focal point:

Name: Michele SALAUN
