2. Description of Project

2.1 Nature and objectives of the project:
The cruise is part of the ICES International Herring Larvae Surveys in 2017/2018. The programme focuses on the abundance and spatial distribution of herring and other fish larvae. All samples are taken on a standard grid using of a plankton sampler ("Nackthai", a modified Gulf sampler). Stations are approximately 10 nm apart.

2.2 If designated as part of a larger scale project, then provide the name of the project and the Organisation responsible for coordinating the project:
ICES IHLS, project conducted each year since 1972.

2.3 Relevant previous or future research projects:
The annual survey estimate is used as a biomass indicator in the assessment of North Sea herring.

2.4 Previous publications relating to the project:
ICES HAWG report (Report of the herring assessment working group)

3. Geographical Areas

3.1 Indicate geographical areas in which the project is to be conducted (with reference in Latitude and longitude in decimal degrees, including coordinates of cruise/track/way points/sampling stations). Please provide coordinates in a separate excel spreadsheet.

North Sea between 49.500 N and 53.000 N and from 1.500 W to 4.500 E

3.2 Attach chart(s) at an appropriate scale (1 page, high-resolution) showing the geographical Areas of the intended work and, as far as practicable, the location and depth of sampling Stations, the tracks of survey lines, and the locations of installations and equipment.
