MRV Alba na Mara

Survey 0821A

PROGRAMME

6-20 June 2021

Ports

Loading: Aberdeen, 05 June 2021 Unloading: Fraserburgh, 20 June 2021

In setting the survey programme and specific objectives, etc. the Scientist-in-Charge needs to be aware of the restrictions on working hours and the need to build in adequate rest days and rest breaks as set out in Marine Scotland's Working Time Policy (Lab Notice 34/03). In addition, the Scientist-in-Charge must formally review the risk assessments for the survey with staff on-board before work is commenced.

In the interest of efficient data management it is now mandatory to return the Survey Report, to I Gibb and the Survey Summary Report (old ROSCOP form) to M Geldart, within four weeks of a survey ending. In the case of the Survey Summary Report a nil return is required, if appropriate.

Project: 20231, 20332, 20593, 20594 - 15 days

Gear:

Subsurface passive acoustic moorings (incl. cetacean detectors and sound recorders) Subsurface VEMCO VR2 salmon tag detector moorings.

Objectives:

- 1. To retrieve and deploy 39 moorings at ECOMMASS, Seagreen and NNG marine mammal/noise monitoring locations (All with C-PODs or F-PODs cetacean click detectors; 19 with C-PODs/FPODs and sound recorders).
- 2. To retrieve 1 mooring near Wick/Duncansby Head.
- 3. To retrieve 46 moorings with VR2 salmon detectors in Aberdeen Bay.

Vessel capability, weather conditions and water depth will dictate whether inshore deployment locations are operationally possible. A daily programme of work will be agreed with the vessel master.

A Notice to Mariners has been issued for all mooring locations. Any updates or location changes will be issued if required.

The ECOMMAS, NNG & Seagreen moorings are priority and the Salmon detectors and the Duncan by head mooring will only be retrieved once this has been done.

Normal contacts will be maintained with the laboratory.

Submitted: P. Stainer 01 June 2021

Approved: I. Gibb 03 June 2021

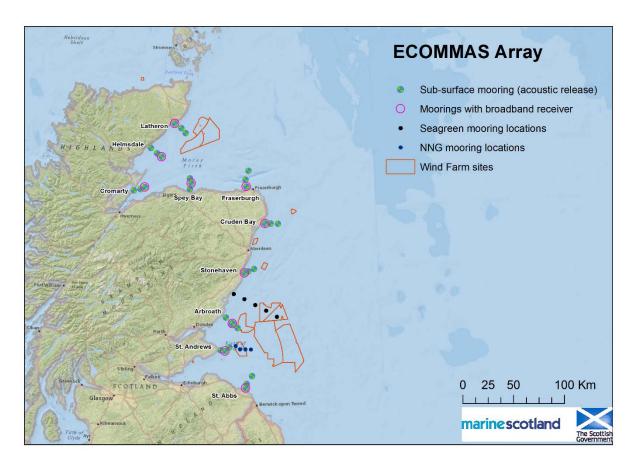

Figure 1: Locations of the ECOMMAS, Seagreen and NNG moorings are detailed in Table 1

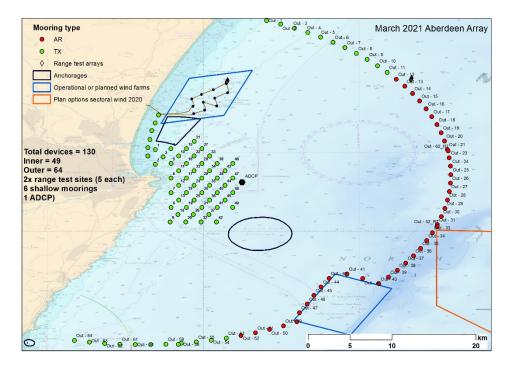

Figure 2: Locations of the 46 salmon detector moorings to be retrieved during 0821A (in red).

Figure 3. Duncansby Head mooring to be retrieved.

Table 1: ID, name and geographic position of all 30 ECOMMAS and Duncansby Head moorings to be retrieved and deployed during 0821A. All moorings are to be subsurface for acoustic release recovery.
