Cruise 0100C

REPORT

10-21 January 2000

Loading: Fraserburgh

Unloading: Fraserburgh

Personnel:

J M Pirie	(In-charge)
A D McIntosh	
L Goodwin	14-21 January
P Simpson	10-15 January
C Wilson	10-15 January

Objectives:

1. To undertake sampling for the NMMP programme.
2. To assist SEPA West in the Clyde NMMP biological effects sampling.
3. To carry out sediment sampling at West Coast dredge spoil dumping sites.
4. To undertake biota and sediment sampling in loch Kishorn.

Out-turn days per project: AE10N 7 days, AE02N 5 days.

Narrative:

Following loading of scientific equipment, the ship sailed from Fraserburgh at 1400 hours on 10 January. Work and staff changeovers were carried out according to the procedures set out in the cruise programme with the exception that Rothesay instead of Ardrossan was used as the changeover port. With all objectives met and additional sediment sampling undertaken at the well site in the Moray Firth to be used for future studies by EPS, docking was completed at 1730 hours on 20 January. All biological, sediment samples and sampling equipment was unloaded and returned to Aberdeen where all samples were stored for subsequent analysis.
