4CR65CRUISE REPORT

F.R.S. "Clupea"

May 2 - 13, 1965

1. The survey of the dumping ground on the Firth of Clyde was duly carried out and will be the subject of a separate report, once the chemical analyses have been completed.
2. The final herring larval survey was completed with the exception of one station in Loch Long, which was excluded on account of fog.
3. The routine survey of Loch Linnhe and Loch Eil was completed, with the addition of photography at stations too hard for grab sampling.

Work was completed by the evening of Tuesday 11th May, and the vessel entered the Caledonian Canal on the following morning to return to Buckie.
