

R1/10.

IN CONFIDENCE - NOT TO BE QUOTED WITHOUT REFERENCE TO THE LABORATORY

FRV GOLDSEEKER

5GR82

CRUISE 5/82

REPORT

26 April - 14 May 1982

OBJECTIVE

Trials of a surface control TV vehicle.

NARRATIVE

The vehicle and trials equipment were transported to Buckie and installed on board, but gale force winds kept the vessel in port until 6 May. Sea trials proceeded from then on without interruption until 14 May.

RESULTS

The major part of the effort was directed to developing a safe technique for steering the underwater vehicle without reference to the visual image, this was entirely successful.

Water samples were collected for MAFF at the designated position.
