

Figure 1. Hydrographic and plankton sample locations along a transect off Stonehaven.

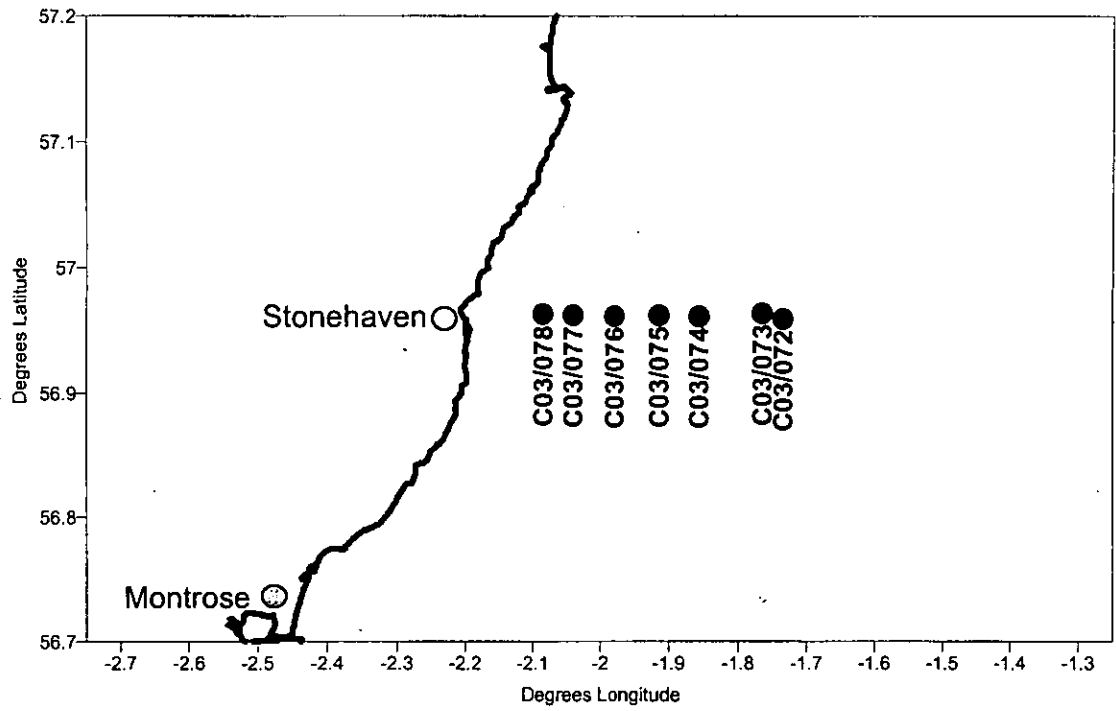

Figure 2. Locations of demersal trawling stations.

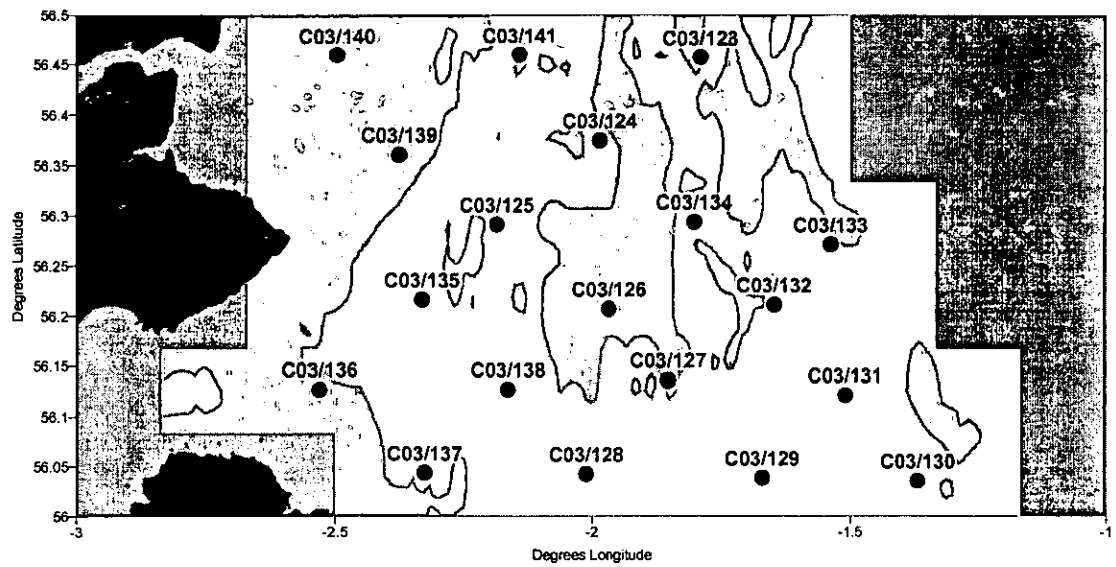

Figure 3. Locations of CTD/Fluorometer/transmissometer dups. (+) show locations of stations on main CTD grid, (x) show repeat stations and high resolution transect over the banks.

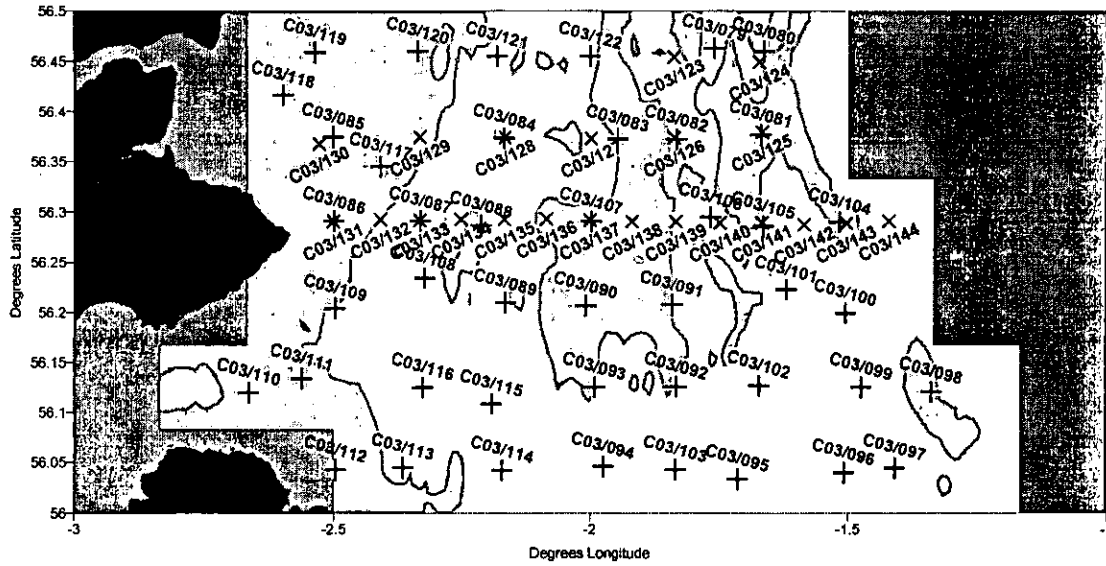

Figure 4. Acoustic survey and seabird survey track. Circles indicate the centre points of the five-minute acoustic integration periods. Filled circles show where seabird survey was undertaken. The positions of pelagic trawls are indicated.

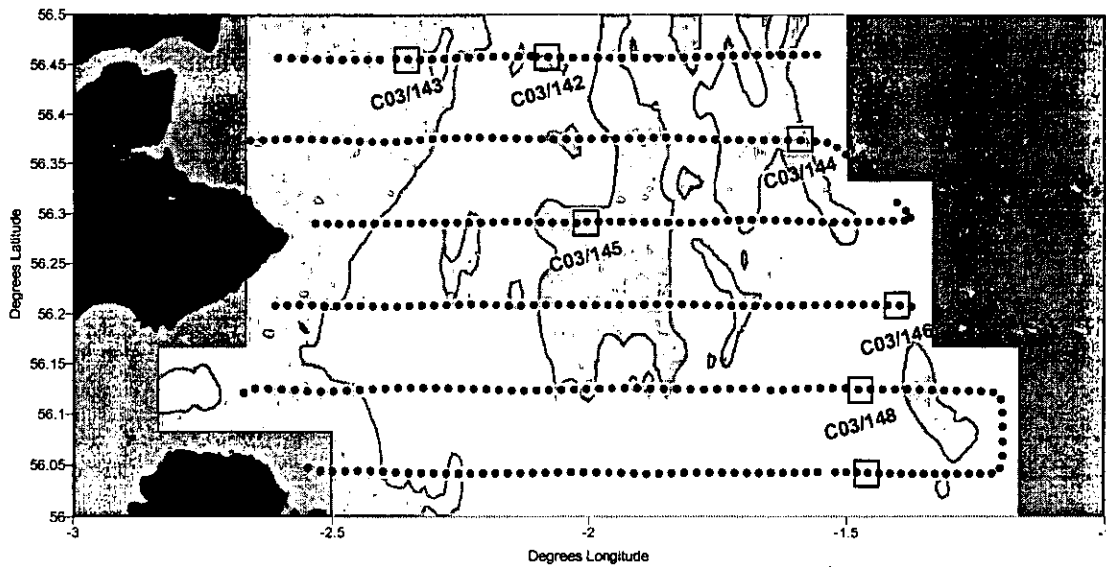

Figure 5. Positions of Sandeel Dredge samples.
